Analytics Configuration Guides

Document Title/Link	Document Description	Last Updated
Analytics in MaaS Portal-Functional Specification	MaaS portal's Analytics tab contains graphs and tables that display application data for events, custom events, timed events, and their parameters. After you have launched your app, navigate to the Analytics Module and select an app to view the charts and graphs that show app usage information. This guide will describe the different analytic datasets and how they're displayed in the portal.	9/26/2017
