

# Analytics Docs

Phunware's [Analytics and Business Intelligence module](#) empowers brands to make smarter, data-driven business decisions. It includes:

- Analytics SDKs and APIs (for iOS/Android apps)
- MaaS portal web management tool, to view robust reporting dashboards

[Releases \(Analytics\)](#) [Training \(Analytics\)](#) [Config Guides \(Analytics\)](#) [Android SDK \(Analytics\)](#) [iOS SDK \(Analytics\)](#) [APIs \(Analytics\)](#)

## Analytics Releases

Analytics functions are now part of the [Core SDK for iOS](#) and [Core SDK for Android](#) - and the Analytics SDK has been deprecated. Please upgrade to the latest version of Core SDK to continue to use Analytics features.

Date	Updates/Release Notes	iOS SDK	Android SDK	Training & Documentation
---	---	N/A	N/A	---

## Analytics Training Resources

Document Title/Link	Document Description	Last Updated
<a href="#">Analytics Module: App Analytics</a>	Video Training that describes how to read the Analytics details displayed in MaaS portal	7/5/2017

Use of this software requires review and acceptance of our terms and conditions for developer use located at <http://www.phunware.com/terms/>

## Analytics Configuration Guides

Document Title/Link	Document Description	Last Updated
<a href="#">Analytics in MaaS Portal-Functional Specification</a>	MaaS portal's Analytics tab contains graphs and tables that display application data for events, custom events, timed events, and their parameters. After you have launched your app, navigate to the Analytics Module and select an app to view the charts and graphs that show app usage information. This guide will describe the different analytic datasets and how they're displayed in the portal.	9/26/2017
